First-year Master's student in mathematics (M1 *Mathématiques Approfondies*) at Université Paris-Dauphine PSL, after three years of French *classes préparatoires*. Interested in optimisation, probability and statistics.

EDUCATION

M1 <i>Mathématiques Approfondies</i> <i>Université Paris-Dauphine PSL, MIDO department, Paris</i>	2026 – 2027
BSc in Applied Mathematics, third year <i>Université Paris-Dauphine PSL, MIDO department, Paris</i>	2025 – 2026
<i>Classes préparatoires</i> MPSI then MP* <i>Lycée Pasteur, Neuilly-sur-Seine</i>	2022 – 2025
Baccalauréat in science, mention <i>Très Bien</i> <i>Lycée Alexandre Dumas, Saint-Cloud</i>	2022

PROJECTS

Optimising a wireless inductive phone charger (TIPE) <i>Two-year research project, Lycée Pasteur</i>	2024 – 2025
- Measured the transfer efficiency of three set-ups (non-resonant, resonant, resonant with a ferromagnetic core: 3.7 %, 12.6 % and 97 %) and the effect of coil misalignment and separation - Modelled the coil field (Biot–Savart, finite elements), derived the resonant transfer function	
Origami applied to the folding of road maps (TIPE) <i>Research project with Giulio Follaco, Lycée Pasteur</i>	2023 – 2024
Compared the classic map fold, the Miura fold and the Flasher on compactness, ease of deployment and legibility, from measurements on paper models	

EXPERIENCE

Private mathematics and physics tutor <i>Self-employed, Paris</i>	2022 – 2026
Academic support and mentoring for high-school students, with a focus on method and problem-solving	
Volunteer boxing coach for children <i>Club de Levallois, Levallois-Perret</i>	2023
Assisted in teaching boxing classes for children aged 5 to 8	

SKILLS

Programming Languages	Python (NumPy, SciPy, Matplotlib), SQL, OCaml French (native), English (C1, TOEFL iBT 100/120, i.e. 5.0/6 on the 2026 scale), Spanish (B1)
------------------------------	---

INTERESTS

Sports Strategy	Karate (black belt, ten years of practice), boxing, weight training Poker; Teamfight Tactics (Master rank, top 0.5 %)
